The activity of crude bromoacetyl-L-carnitine preparations against *Trypanosoma brucei* and the roles of threonine/pyruvate in non-hexose/glycerol ATP production

Published On: April 29, 2023 | Pages: 001 - 003

Author(s): Philip G Penketh* and Curtis L Patton

The *Trypanosoma brucei* group trypanosomes (*Trypanosoma brucei gambiense* and *Trypanosoma brucei rhodesiense*) cause an invariably fatal disease in humans, and *Trypanosoma brucei brucei* a fatal disease in cattle, if left untreated [1].
