Unbalanced intake of methyl donor supplements, may lead to DNA methylation and cause breast cancer in offspring

Published On: July 31, 2020 | Pages: 020 - 023

Author(s): Arefhosseini Seyed Rafie, Alijani Sepideh* and Mohammadi Sumaieh

Statistical data in Iran reflects a worrying trend for an increased incidence of breast cancer. recent national data on average annual crude incidence for primary breast cancer indicated 22.6 (95%CI 22.1-23.1) per 100,000. It seems that genome encoding with no changes in the sequence of DNA contributes to Lamarck's theory as a probable causative factor for the deterioratio ...

It's all about balancing-handling free speech issues under the German Basic Law

Published On: March 19, 2020 | Pages: 001 - 005

Author(s): Dieter Dörr* and Alexander Natt

The first Articles of the German basic law contain the so-called basic rights. As Art. 1 para. 3 states they bind the legislature, the executive and the judiciary and therefore all state authority as directly applicable law. At first glance this sounds familiar and very similar to the bill of rights respectively the first ten amendments to the United States Constituti ...
