Key Factors for Successful Protein Purification and Crystallization

Published On: August 10, 2018 | Pages: 001 - 007

Author(s): Eijaz Ahmed Bhat*, Mohnad Abdalla and Irfan A Rather*

Protein purification and crystallization problems have been noticed for many years. The strategies developed for protein solubility and crystallization have improved the protein production and provide high-resolution crystals for structural studies. The protein solubility is achieved by the Site-directed mutagenesis that generates the hydrophobic to hydrophilic mutati ...
