RETRACTED: A Life-threatening Case Report of Candidemia in an Infant Hidden behind Multiple Co-morbidities Detected by MALDI-TOF

Published On: May 31, 2025 | Pages: 001 - 007

Author(s): Sudeshna Das*, Deepti Rawat, Ravinder Kaur, Praveen Kumar and Ashish Williams

Background and purpose: *Candida auris* is an emerging species of the *Candida* genus causing outbreaks of nosocomial infections worldwide. It is a multidrug-resistant fungal pathogen causing disruption in healthcare settings as it quickly colonizes the surfaces in hospitals and ICUs and causes repeated infections. This report describes a case of *C. auris* fungemia from a ...
