COVID-19 and SARS-CoV-2: Despite the vaccination, new targets/drugs for treatment and the virus cycle mechanisms still have to be continually investigated

Published On: February 10, 2021 | Pages: 001 - 003

Author(s): Victor GO Evangelho, Camila F Mattos, Marcia R Amorim, Juliana S Novais, Marcos K Veiga, Murilo L Bello* and Helena C Castro*

Several countries are suffering with COVID-19 second wave that has been worse than the first one. In addition, new challenges are being imposed by new mutations and their high transmissibility, such as B.1.1.7, identified in the United Kingdom, and the strains P.1 and 501Y.V2, from Brazil and South Africa, respectively. They threaten the immune effects of the new laun ...
